

**National Interagency Coordination Center
Incident Management Situation Report
Monday, August 25, 2014 – 0530 MT
National Preparedness Level 3**

National Fire Activity

Initial attack activity: Light (65 new fires)
 New large fires: 1 (*)
 Large fires contained: 1
 Uncontained large fires: ** 18
 Area Command Teams committed: 0
 NIMOs committed: 0
 Type 1 IMTs committed: 2
 Type 2 IMTs committed: 3

** Uncontained large fires include only fires being managed under a full suppression strategy.

Northern California Area (PL 3)

New fires: 14
 New large fires: 1
 Uncontained large fires: 9
 Type 1 IMTs committed: 2
 Type 2 IMTs committed: 1

July Complex (2 fires), Klamath NF. IMT 1 (Opliger). Four miles east of Sawyers Bar, CA. Timber. Active fire behavior. Numerous structures threatened. Evacuations, road and area closures in effect.

Happy Camp Complex (3 fires), Klamath NF. IMT 1 (Pincha-Tulley) and IMT 2 (Wakoski). One mile east of Happy Camp, CA. Timber, brush and grass. Active fire behavior. Numerous structures threatened.

KNF Beaver, Klamath NF. Started on private land 16 miles northwest of Yreka, CA. Timber, brush and grass. Interior burning. Road and area closures in effect.

Lodge Complex, Mendocino Unit, Cal Fire. Twelve miles northwest of Laytonville, CA. Timber and chaparral. Interior burning.

Log, Klamath NF. Six miles west of Greenview, CA. Timber. Minimal fire behavior.

* **Oregon**, Shasta-Trinity Unit, Cal Fire. Three miles northwest of Weaverville, CA. Brush and grass. Active fire behavior. Numerous structures threatened. Evacuations in effect.

LNF – Lassen National Forest

Northwest Area (PL 3)

New fires: 19
New large fires: 0
Uncontained large fires: 6
Type 2 IMTs committed: 1

Deception Complex, Willamette NF. IMT 2 (Watts). Two miles west of Oakridge, OR. Timber. Moderate fire behavior. Area closure in effect.

Carlton Complex, Northeast Region, DNR. Started on private land seven miles south of Twisp, WA. Timber, light logging slash, brush and grass. Minimal fire behavior. Last report unless significant activity occurs.

Little Bridge Creek, Okanogan/Wenatchee NF. Ten miles west of Winthrop, WA. Timber. Smoldering. Area closure in effect. Last report unless significant activity occurs.

Upper Falls, Okanogan/Wenatchee NF. Seventeen miles north of Winthrop, WA. Timber, light logging slash and grass. Smoldering. Area closures in effect. Last report unless significant activity occurs.

Somers, Wallowa-Whitman NF. Fifteen miles east of Imnaha, OR. Timber and grass. Creeping and smoldering with isolated interior torching. Structures threatened. Precipitation occurred over the fire area yesterday.

Snag Canyon, Southeast Region, DNR. Started on private land 12 miles north of Ellensburg, WA. Timber, brush and grass. Interior smoldering. Road closures in effect.

South Fork Complex, Prineville District, BLM. Twenty miles southwest of John Day, OR. Timber, brush and grass. Creeping and smoldering with occasional torching. Area closures in effect.

South Cle Elum Ridge, Okanogan/Wenatchee NF. Seven miles southwest of Cle Elum, WA. Timber, logging slash and brush. Interior smoldering.

Auvil Canyon, Southeast Region, DNR. Six miles northwest of Waterville, WA. Brush and grass. No new information.

Predictive Services Discussion: A broad upper level low pressure system centered in Montana will slowly shift east today, with cool and wet weather continuing for much of the northern Rockies and Plains. This will allow a ridge of high pressure aloft to move toward the west coast with warming and drying. Showers and thunderstorms are also expected from the central Rockies through the Great Lakes region along a frontal boundary. Additional storms will develop today from the Tennessee Valley southward to the Gulf Coast, while the Atlantic coastal states will be dry and warm.

FALLING SNAGS

Felling Safety Category

Falling snags (dead, standing trees without leaves or needles in the crowns) present a significant hazard to wildland firefighters. Snags typically have much lower fuel moistures than live, green trees; and they burn more readily. In the process, they often throw spot fires far in advance of the main fire and often burn through more quickly than green trees, falling with little or no warning.

- The risk of injuries from falling snags increases during the night operational period when visibility is greatly reduced.
- While the cooler, nighttime period is generally a more effective time to gain control of wildfires, the increased risk from unseen falling snags may limit the widespread use of crews at night in areas of dead and dying timber.
- Environmental conditions that increase risk from falling snags:
 - Strong winds
 - Night operations
 - Steep slopes
 - Diseased or bug-killed areas
- Things to consider when assessing the potential hazards of both snags and green trees:
 - Trees have been burning for an extended period.
 - High-risk tree species (those that are known for rot and shallow root systems) are in the area.
 - Numerous downed trees
 - Dead or broken tips and limbs overhead
 - Accumulation of downed limbs
 - Absence of needles, bark or limbs
 - Leaning or hung-up trees
- Mitigation measures to take:
 - Identify and flag all high-risk snags and green trees.
 - Keep personnel out of the high-risk areas until the hazard has been removed.
 - Establish lookouts.
